Mpatapo

Mpatapo is a symbol image from the Adinkra (a system of symbols from Ghana in West Africa). It is meant to represent the "knot of pacification/reconciliation," and as such it is the symbol for reconciliation, peacemaking and pacification. "Mpatapo represents the bond or knot that binds the separate parties in a dispute to a peaceful, harmonious reconciliation. It is a symbol of peacemaking after strife." The Historical Age of Adinkra Dates Back more than two full centuries and it's origin is African Wisdom Symbolism Communications [non-literacy meanings] which are basic root communication structures that even breaks or overrides both written and spoken language barriers between peoples. Mpatapo is very important and is one of very few symbols in the Adinkra set of over 100 considered a Solomon's Knot symbol of importance.

To be treated as a serious to actually progress a resolution of a conflicted issue, one involved party can declare and issue and community present and attach the symbol Mpatapo against [or to attach] all other involved parties in a conflict or dispute. The Mpatapo attachment is informing society or community that there is issues here to be placed for reconciliation in peaceful ways. The attachment of Mpatapo declares binding knot until the conflict is resolved and the Mpatapo binding is therefore peacefully released [unbound / unattached] to any and all parties.

My name is James Martin Driskill and I am a Targeted Individual of Gang Stalking.

This effect began to surface when I was in Oakland CA and in the events I noticed that was maladjusted behavior of my peers. I don't need the interference of a moderator -- as I have had to deal with -- most every posting purpose I have on this forum. The involvement of the moderator on this forum to this hate conspiracy might be prudent to investigate. I do not need to be told what is true and not. I do not write these things in malicious intent.

Dr, Pierre here is credited as a Psychology Today Blog writer -- and that is what I am placing upward into view.

I need to place an image so that the doctor and magazine release the seriousness of the oversight to product a public fraud of disinformation on this subject --- There is a science that covers the investigation of what seems apparent.

What is a NPI Number? : The National Provider Identifier (NPI) is a unique identification number for covered health care providers. The NPI is a 10-position, intelligence-free numeric identifier (10-digit number). This means that the numbers do not carry other information about healthcare providers, such as the state in which they live or their medical specialty. The NPI must be used in lieu of legacy provider identifiers in the HIPAA standards transactions. Covered health care providers and all health plans and health care clearinghouses must use the NPIs in the administrative and financial transactions adopted under HIPAA (Health Insurance Portability and Accountability Act).

Where NPI should be used? : The NPI must be used in place of legacy provider identifiers, such as a Unique Provider Identification Number (UPIN), Online Survey Certification & Reporting (OSCAR) and National Supplier Clearinghouse (NSC) in HIPAA standard transactions. There are two categories of health care providers for NPI enumeration purposes. Entity Type 1 providers are individual providers who render health care (e.g., physicians, dentists, nurses). Sole proprietors and sole proprietorships are Entity Type 1 (Individual) providers. Organization health care providers (e.g., hospitals, home health agencies, ambulance companies) are considered Entity Type 2 (Organization) providers.

Who must obtain NPI? : All health care providers who are HIPAA-covered entities, whether they are individuals (e.g., physicians, nurses, dentists, chiropractors, physical therapists, or pharmacists) or organizations (e.g., hospitals, home health agencies, clinics, nursing homes, residential treatment centers, laboratories, ambulance companies, group practices, Health Maintenance Organizations [HMOs], suppliers of durable medical equipment, pharmacies) must obtain an NPI. The NPI will be used by HIPAA-covered entities (e.g., health plans, health care clearinghouses, and certain health care providers) to identify health care providers in HIPAA standard transactions. A covered health care provider, under HIPAA, is any health care provider who transmits health information in electronic form in connection with a transaction for which the Secretary of Health and Human Services has adopted a standard, even if the health care provider uses a business associate to do so.
